

****HELTON UNITED ACT OF 2026****

Original 11-bill package drafted by Andrew Helton of Illinois

One-page handout for Members of Congress and staff (ready to print or email)

Authored by: Andrew Helton – Illinois working father, \$30k/year income, no donors, no PACs

Website: www.citizenhelton.com

Total impact (2027–2036)

- Annual net savings: \$202 – \$271 billion
- 10-year debt reduction (dynamic scoring): \$2.9 – \$3.7 trillion
- No tax increases on anyone earning under \$400,000
- Preserves every individual-side 2017 tax cut and 199A pass-through deduction

What American families actually get

- 12 weeks paid parental leave (both parents)
- Childcare credit increased to \$3,200/\$2,000 per child (fully refundable)
- 750,000 new mixed-income homes – 40 % priority for veterans
- ACA premiums drop \$1,800 – \$3,400 per year for the average family
- Prescription drugs cut 25–35 % via importation + Trump Most Favored Nation pricing
- Border wall completed + merit-based legal immigration
- Government shutdowns banned forever
- Tiered retirement & Social Security caps: working families get the cap lifted, millionaires pay more and extend solvency 10–15 extra years

Fully paid for – every dollar of new spending or tax relief is offset by waste cuts, foreign-aid reprogramming, PBM/pharma reforms, and high-earner revenue (no middle-class tax hike).

Bipartisan proof

Every major title has already passed the House or Senate with big bipartisan votes between 2017–2025.

11 ready-to-introduce bills – full text available today

Any Member can copy-paste and drop these in the hopper on Day 1 of the 119th Congress and take credit tomorrow.
